PROFESSIONAL SUMMARY

- Tech-driven professional with a strong foundation in software development and hands-on project implementation. Skilled in simplifying complex technical concepts, mentoring students, and supporting curriculum integration aligned with industry standards. Focused on enhancing employability through practical learning and structured training delivery.

EDUCATION

B.Tech in Computer Science Engineering, Parul University 2022 – 2026

EXPERIENCE

CodSoft — Python Developer Intern Jan 2025 – Feb 2025

- Developed and optimized Python-based automation scripts for data processing tasks to improve workflow efficiency. Applied object-oriented programming principles to build reusable modules, performed debugging, and enhanced performance through structured code refactoring.

Meru Technosoft Pvt Ltd — QA Testing Intern Jan 2025 – Feb 2025

- Contributed to manual and functional testing of web applications to ensure product reliability and defect-free releases. Designed and executed test cases, reported bugs using structured documentation, and collaborated with developers to validate issue resolution.

PROJECTS

Language Translation Model — AI/NLP Dec 2024 – Nov 2025

- Built an AI-driven real-time language translation system to convert speech/text across multiple languages, addressing communication barriers in multilingual environments. Implemented a modular backend using Python and Flask, integrating Whisper for speech recognition, MarianMT for translation, and gTTS for speech synthesis with API-based architecture and real-time audio processing.

Automation Testing — Selenium Nov 2025

- Developed an automated testing framework to reduce manual regression effort and improve test reliability. Designed and executed Selenium-based test scripts in Java, implementing reusable test cases, element locators, and structured reporting to validate web application workflows efficiently.

Vishal's Services — Full Stack Web Application Dec 2025 – Feb 2026

- Built a scalable service-listing web application to provide users with structured service information and responsive UI experience. Developed frontend using React and TypeScript with Tailwind CSS, and structured backend using Node.js with modular architecture to support API integration and maintainability.

TECHNICAL SKILLS

- **Programming:** Python, Java, DSA
- **Databases:** MySQL
- **Tools:** Git, GitHub, Selenium, Jira

ACHIEVEMENTS & CERTIFICATIONS

- Python Developer Internship — CodSoft
- DBMS and SQL — Infosys Springboard
- QA Testing Internship — Meru Technosoft Pvt Ltd
